Perot Foundation NTRC: Then & Now

- In 10 years, the PNTRC has grown from 8 to 40 coordinators in 2021, handling more than 150 clinical trials a year.
- The PNTRC began as a service in the Department of Neurology, but in 2018, became a part of the O’Donnell Brain Institute.
- The PNTRC added a biorepository core in 2021 that provides researchers with sample acquisition, a central laboratory for processing, and storage of biospecimens.
- Several online tools, such as iLab billing, have been added to streamline processes and keep project goals on track.
